

SAVIE- Anikó Barcziová

1. Gender
2. Age
3. Is food saving an important issue for you?
4. What do you do with leftovers in your household?
5. Would you buy food before expiration time for lower price?
6. Is it important for you to decide what you eat for lunch/dinner or the price motivates you more?
7. How much do you spend weekly for food (grocery, restaurants)? (per person)
8. Is food delivery service important for you?
9. Would you like to receive discounts in supermarkets/restaurants?
10. Where would you like to receive discounts?

Respond: 11

This app is a real project in realisation by me and my cousin. We want to create an app, thanks to what we could decrease the food waste in the world. This app would be in connection with groceries, bakeries, restaurants, which could sell their products before the expiration date/before the closing time. We need to emphasize that the food what they sell is still good, in good quality. However, according to the state regulation system they should be thrown away.

Thanks to this questionnaire we would like to get know if there is need for the app (questions 3, 5, 6, 9, 10), which is our target group (questions 1, 2, 7) and if this app should hire or collaborate with employees for delivery service.

The questionnaire should be sent to more respondents, since 11 answers are not enough to made a statement according to what we should create our business plan.
