

# Introduction to ChargePoint Company

---

ChargePoint is an electric vehicle infrastructure company based in Campbell, California. ChargePoint operates the largest online network of independently owned electric vehicle charging stations operating in 14 countries in North America and Europe and make the technology used in it.

ChargePoint is a market leader and has helped pioneer networked fueling, offering one of the industry's most comprehensive portfolios of hardware, software and services for commercial, fleet and residential customers.

Businesses, fleets and drivers turn to the ChargePoint team for EV charging education, resources and technology as they look to participate in the new fueling network. ChargePoint has more than 4,000 commercial and fleet customers and has delivered more than 87 million charging sessions to date.

ChargePoint's established business model, comprehensive portfolio for nearly every charging scenario today, recurring revenue, and growing customer base demonstrate it is well positioned to continue to lead as the electric mobility revolution accelerates.

# Products

---

The CP4100 Type 2 socket charging station is designed for businesses, fleets and other organizations offering EV charging as a facility or service for employees and customers.
