

Hypothesis

Charles Nyakumbo

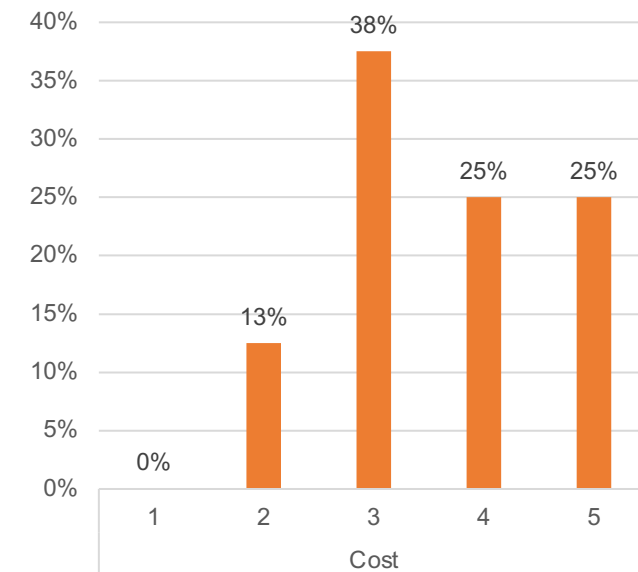

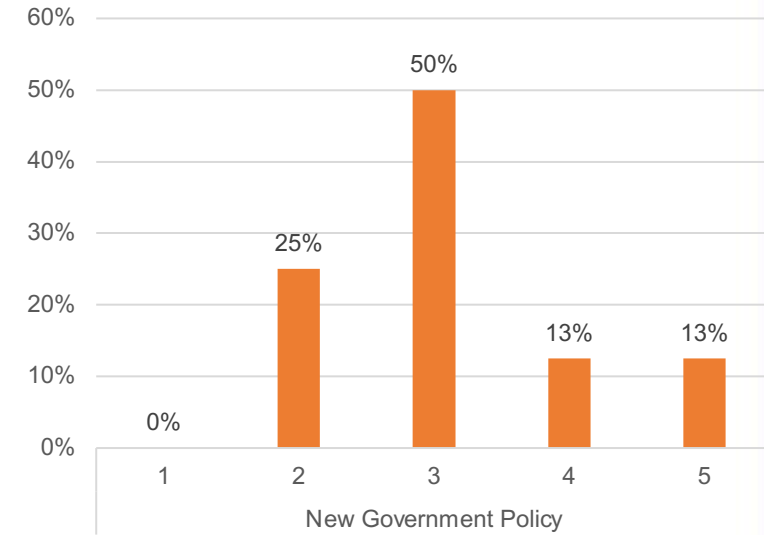

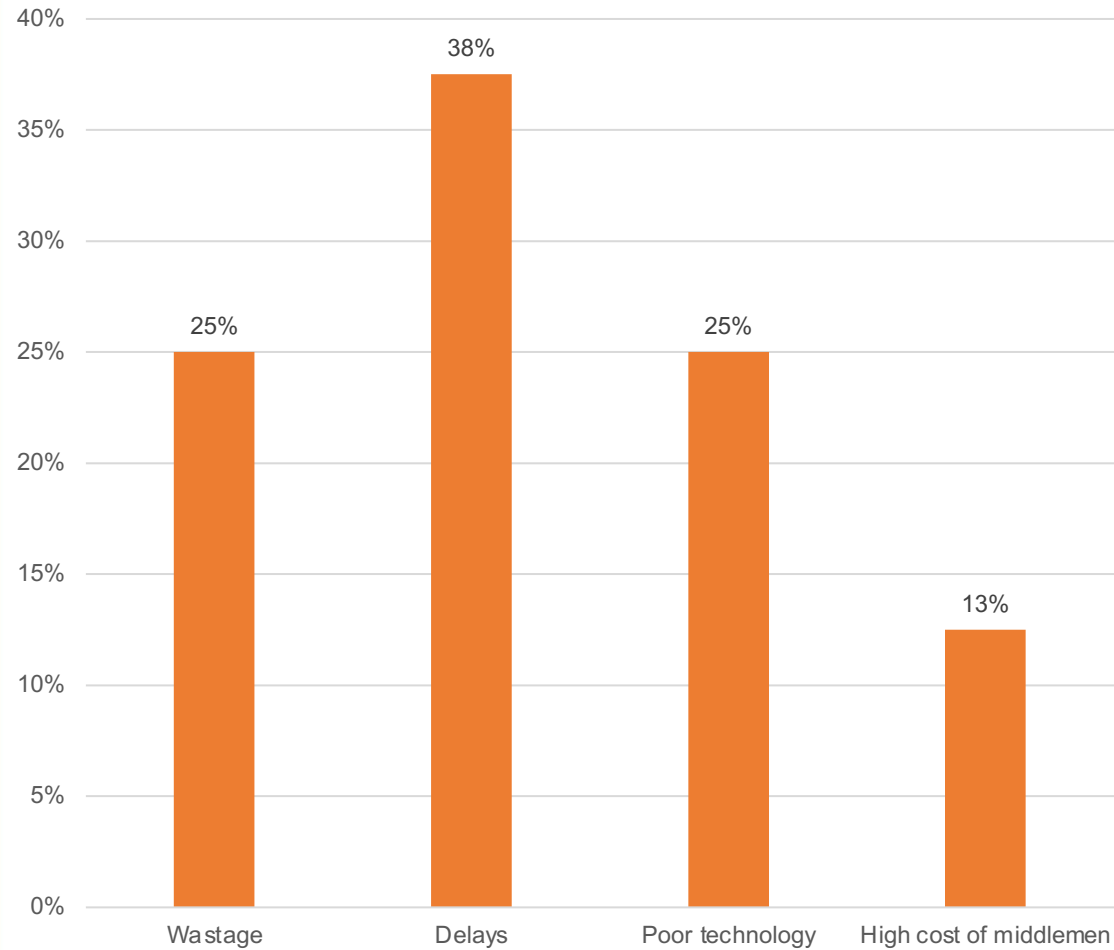

There is a significant gap between the quality suppliers and resellers in the supply chain

Initial Assumptions

Major gaps in the supply chain are;

- a) Wastages
- b) Delays
- c) Poor technology
- d) High cost of middlemen
- e) Government policies
- f) Information and poor data management.

Analysis

Hypothesis Validation

Indeed, there are significant gaps between the quality suppliers and resellers in the supply chain

Validated Assumptions

1. Wastage as a major issue
2. Delays
3. Data management
4. Technology irrelevance

Null Assumptions

1. Government policy is insignificant in the supply chain
2. Cost is not a major issue
